Internship

Intern – AI/ML Engineer | Certificate **July 2025 - August 2025**

Bokaro Steel Plant

- Designed and implemented structured machine learning workflows using Python, focusing on data preprocessing, feature extraction, and supervised learning models for predictive analysis.
- Refined model accuracy through iterative training, validation, and performance optimization, leveraging libraries such as Scikit-learn, NumPy, and Pandas.
- Translated analytical insights into deployable solutions by integrating ML models with applications and visualizing results for stakeholders.

Projects

DevOps Monitor - Automated Cloud-Native Health Monitor | *Next.js, Gemini API, Google Cloud* **October 2025**

- Developed a cloud-native monitoring system performing real-time health checks every 5 minutes across multiple web endpoints, helping detect service failures and reduce mean time to detection (MTTD) by 70%.
- Engineered an automated CI/CD pipeline using GitHub Actions and YAML, triggering health checks on every code push and scheduled cron jobs, executing 100+ automated checks per day without manual intervention.
- Utilized Ubuntu-latest virtual runners for consistent execution environments and GitHub Actions logs for centralized observability, maintaining full audit trails for uptime verification and debugging.

Hotel Chandra Bharti – MERN Stack Hotel Website **January 2025**

- Developed a responsive hotel management web application using the MERN stack with separate Admin and User panels for managing room bookings, customer information, and reservations.
- Built a secure authentication system using JWT and bcrypt hashing, and integrated Google reCAPTCHA v2 to protect the platform from unauthorized access and automated bot login attempts.
- Used MongoDB Atlas for cloud database management and secured application configurations using .env environment variables for safe handling of credentials.

Certifications

Master Generative AI & Generative AI tools (ChatGPT & more) **September 2025**

Infosys — Certificate Link

The Bits and Bytes of Computer Networking **June 2024**

Google — Certificate Link

Technical Skills

Languages: Python, JavaScript, C, HTML5, C++

Technologies/Frameworks: CI/CD Pipelines, Monitoring & Logging, NIST Cybersecurity Framework, CIS Critical Security Controls

Skills: Linux, Docker, Kubernetes, Jenkins, Bash

Education

Lovely Professional University **Since 2023 – Present**

Computer Science and Engineering — CGPA: 6.69 *Phagwara, Punjab*

Sree Ayyappa Public School **2022 – 2023**

12th with Science — Percentage: 62 *Bokaro, Jharkhand*

Sree Ayyappa Public School **2020 – 2021**

10th with Science — Percentage: 68 *Bokaro, Jharkhand*
